

Analog Filter Patches

Dear Virus user,

the 60 Analog Filter Patches come in three different formats.

Analog Filter Sounds.lib can be loaded as a SoundDiver library

Analog Filter Sounds.mid is a standard MIDI file

Analog Filter Sounds.syx is in SysEx RAW format

Please note that uploading the new patches into your Virus will replace the user patches A000 - A060. Please backup your user patches first as a precaution. Details in how to backup your own sounds can be found in the Virus user manual.

"Tausend Dank!" to Ben Crosland, Howard Scarr and Matt Skaggs for the fantastic Analog Filter patches. Also we would like to thank out beta testers for taking the time to help us improving our products.

With best regards,

The Access team
