Configuring Traktor Pro for the DJ Console Rmx (Windows version)

1- Configuration of the ASIO driver/ MIDI channel

- a) From the DJ Console control panel, set the audio mode to ASIO
- b) Click the **ASIO** tab and configure the various driver settings to be used by Traktor.

NOTE: These settings cannot be modified once Traktor has been launched.

c) Next, go to the **ADVANCED** tab, and make sure that MIDI channel is set to **1**.

This is very important as the profile provided is configured for the DJ Console Rmx to work on this channel.

If you have multiple MIDI controllers, or would like to use the DJ Console on a different MIDI channel, you will need to modify the profile accordingly. Consult Traktor's user manual for more details.

2- Audio configuration in Traktor

a) From the **FILE** menu, select **Audio Setup**. Choose **Hercules DJ Console Rmx ASIO** as **Audio Device**. Notice that the SAMPLE RATE and AUDIO LATENCY should reflect the configuration previously made in the Control panel

• Audio Setup	Audio Setup			
 Output Routing 	Audio Device	Hercules DJ Console RMX ASIC) 👻	
 Input Routing 	Sample Rate	44100 Hz 💌		
MIDI Setup	Audio Latency		10.5 ms	Settings

c) Under Output Routing, set Output 3 & 4 for Monitor and Output 1 & 2 for Master
