Amp Model	AKA	Spider III	SpiderII
		New to the Spider III amplifier is a huge range of killer mid-gain guitar tones. A critical advancement was made to the sound and feel of the Spider III line when a discerning panel of artists focused in on the venerable "mid-gain" range of tone to deliver the complex, layered and dynamic amp tone we all appreciate from classic and boutique amps.	
Clean Red	Clean	Red LED - Select this Amp Model and adjust the tone controls to get crisp, amazing clean tones, great warm jazz tones, and all the high-end shimmer you'll need with a generous amount of bottom end.	This amp model gives you crisp, amazing clean tones all the way to warm jazz tones.
Clean Green	Glassy	Green LED - We developed this Amp Model to emulate those late 60's and early 70's clean tones. It started off as an Amp Model based on* a 1973 Hiwatt® Custom 100. We extended the tone control range and tightened up the low end.	This amp model was developed to emulate late '60s and early '70s clean tones.
Twang Red	Twang	Red LED - This Amp Model draws on* our analysis of mid 60's Fender® amps, including the blackface '65 Twin Reverb® and blackface '64 Deluxe Reverb®. We wanted an Amp Model that has that classic glassy high end tone, with some snap and bite.	This amp model is based on* our analysis of mid '60s Fender® amps. Twang "red" has that classic glassy tone with some snap and bite.
Twang Green	Twin Twang	Green LED - This Amp Model is based on* a number of vintage tweed amps. We evaluated a '53 Fender® tweed Deluxe Reverb®, '58 Fender® tweed Bassman® and a '60 Gibson® Explorer® to create a swingin' Rockabilly tone.	We based this model on* a number of different vintage Fender® tweed amps like a '53 Deluxe Reverb® and a '58 Bassman®. Add a bit of Reverb and some Slap Echo and you'll have swingin' Rockabilly tone.
Blues Red	Blues	Red LED – Based on* a mix of a '65 Marshall® JTM-45, a '58 Fender® Bassman®, a '63 Fender® Vibroverb and a Supro®, this Amp Model slides between gritty swamp-infected cleans to syrupy smooth, walloping drive tones.	This amp model slides between gritty, swamp infected cleans to syrupy drive tones.
Blues Green	Class A	Green LED - This Amp Model is based on* a fawn Vox® AC-30 amplifier with an updated and expanded tone control circuit. We wanted to capture that early British pop rock tone that the Beatles and the Stones are so well known for.	This amp model accurately captures that early British pop/rock tone. Top of the pops man!
Crunch Red	Crunch	Red LED - This sound was crafted during our studies* of the '68 Marshall® Plexi 50 Watt. This type of Marshall® amp was used by a number of early metal bands. Crunch provides a wider range of tone control settings than the original Marshall® amp had.	This model is based on* a '68 Marshall® "Plexi" 50-watt. Crunch "red" gives you a wide range of tones even at its highest gain settings.
Crunch Green	On Fire	Green LED - This Amp Model is based on* a '68 Marshall® Plexi 100 watt with a few added extras; The combination of a Variac and the jumped input channels creates that infamous brown sound.	We based this model on* a '68 Marshall® "Plexi" 100-watt with a few added extras. We threw in the Variac "brown sound" trick on top of jumping the input channels! Now you're on fire!
Metal Red	Metal	Red LED - This Amp Model is based on* the Mesa/Boogie® Dual Rectifier®. Use this Amp Model to get a tight and punchy, high gain Metal sound.	This monster truck of tone delivers a tight bottom-end that's big, powerful, and fast. Use this amp model to get a punch, high-gain metal sound.
Metal Green	Spinal Puppet	Green LED - This sound was created to be an aggressive high gain Amp Model with a unique Mid control that will sweep through an entire spectrum of tone on one knob. The Mid knob for this Amp Model changes the character of the distortion. When set to minimum, the distortion exhibits Fuzz pedal characteristics. When the Mid is set to noon, it mimics the creamy modern high gain amp tones. And when the Mid knob is turned up to max, it's very much reminiscent of that Class A sound.	This amp model was created to be an aggressive high-gain amp model with a unique Mid control that will sweep through a huge tonal spectrum.
Insane Red	Insane	Red LED - This model is our "dialed in for shredding" version based on* the Mesa/Boogie® Dual Rectifier® red channel. It combines the intensity and impact of Metal Red, but delivers more midrange and teeth for that bone-crushing, brain piercing insane grind.	We combined the most high-gain earth-shaking tone we could muster, tossed in a sub-octave fuzz, and threw in a phase shifter on top just for good measure. The result: the craziest model you've ever heard, producing screaming, screeching highs and lows to rock your core. Play a lick with single notes and listen as the note is twisted into an alternate dimension. Use with extreme caution.
Insane Green	80s Solo	Green LED - Our goal with Insane was to provide you with as much input gain distortion as possible short of complete meltdown. You get an obscene helping of distortion, while still retaining tonal definition and character.	Our goal with Insane was to provide you with as much distortion as possible short of complete meltdown. Crank up the Drive control and prepare to dominate.
