

Installing the KORG FireWire Audio/MIDI driver ver1.10

NOTE: Please uninstall the KORG FireWire Audio/MIDI driver from control panel if version 1.01 or earlier exists.

1. Extract the .zip file you downloaded.
2. Run "Setup.exe" in "Driver" Folder.
- 3: Install the KORG FireWire Audio/MIDI driver as directed on screen.
- 4: When the following screen appears during the process of installing the KORG FireWire Audio/MIDI driver, connect the FireWire cable and power-on the ZERO4/ZERO8.

- 5: When installation of the KORG FireWire Audio/MIDI driver has finished, exit the installer.
If you are asked to restart, choose [Yes] to restart your computer.
