

Classic Collection

This is a collection of classical programs and combinations: I did it 'cos I never like very much classical factory programs and combi, they do not sound as real as I want. So I programmed this pcg that wants to simulate what the listener really listen in a theatre. Real reverb, real pan... but all this is so subjective that I do not know if you will appreciate this work.

Anyway: I try to simulate the reverb and all the effect (pan, chorus, delay...) of Verdi's Theatre of Trieste (Italy) an old Theatre probably the most important theatre of our region.

At first I thought that I would have release a whole bank of combi but my free time isn't much so I decide to publicate this part of the work and in the future... whatever will be will be!

Technical information on pcg

The program pcg E000-E044 aren't obviously made from scratch, I use factory preload sounds and tweak them (LFO, Filters, Amp, and especially effects).

The combinations are set up to keep the orchestral pan effect of any instruments. I do not set up any real time control 'cos I think they're very personal settings and so I leave them to you. I don't know anything about Harp so the "arp" arpeggio settings aren't a real Harp arpeggio!

Feel free to share this pcg or to tweak and change sounds freely. If you modify this pcg I'd like to have a copy of your work sending it to srachmaninov@libero.it (available for any kind of feedback).

REMEMBER TO SAVE ALL YOUR DATA BEFORE INSTALL!

Lorenzo

List of combinations

- A000 Camera (a small camera orchestra)
- A001 Reeds Quartet (Bassoon Clarinet Oboe and Flute)
- A002 Strings Quartet (Contrabass Cello Viola and Violin)
- A003 Symphonic Orc
